Physical Supply in Turkey

BMS United one of the biggest bunker traders in the Mediterranean, through an exclusive deal with Turkey's Port of Canakkale expands its presence as a physical supplier.

Enabling a new supply option at the Turkish Straits offering Fuel Oil and LSMGO 0.1%, supplying by barge or trucks, at multiple locations, we answer our clients' needs for a one-stop solution, ensuring timely, flexible and high-quality refuelling in the area, without any deviation.

'To carry on our steady and controlled growth, we intend to add significantly more focus on two critical areas: talent development and geographical expansion. It goes without saying that success in the latter depends on success in the former', commented Lars Nielsen, Executive Group Director, BMS United.

BMS United now offers bunker deliveries in various ports and anchorages along the Dardanelles:

Çanakkale, Dardanelles Strait - Bozcaada Anchorage, İzmir, Nemrut Bay, Aliağa, Akçansa, Dikili, Bandırma, Karabiga, İÇDAŞ, Şevketiye & Güllük.

Bunkering at the Dardanelles Strait, gives vessels the significant advantage of passing the Bosphorus Strait fast and efficiently by lifting bunkers prior to their entry into the strait, thus taking advantage of the two-way traffic of the Dardanelles instead of the one-way traffic of the Bosphorus Strait.

The new operation offers two supply tankers with a capacity of DWT 1400 and 3500 respectively as well as a 8,000 metric tonnes land storage at Canakkale, with additional services including deslopping, demucking, tank cleaning and gas measuring.

For more information regarding bunkering in Turkey contact your closest BMS United Bunker Office.
